STEPHENS' DYES for STAINING WOOD, as a SUBSTITUTE for PAINT. For decorating churches, large public rooms, and theatres, as well as private dwellings. When economy is a consideration of material and time is of importance, these Dyes will be found of the greatest advantage, as they give a rich colour to plain woods, while they reflect all the beauty of the natural grinding, which is so superior to imitations by art, and, at the same time, avoid the disagreeable smell and deleterious consequences of paint. The Dyes, or Stains, are prepared and sold by HENRY STEPHENS, 54, Stamford-street, Blackfriars-road, London, in bottles of 6d. and 1s. each, and at 1ss. per gallon. The Dark Colour may be obtained in powder at 6s. per lb., which dissolves in water to form the liquid, and 1 lb. will make one gallon of stain. N.B. H. TANQUERAY, Secretary at the temporary offices of the Company, 26, New Broad-street, City.

TIMBER AND DEAL SAWING AND PLANING MILLS,
Belvedere-road, Lambeth, near Waterloo-bridge.
THE GENERAL WOOD-CUTTING COMPANY continue to receive the most satisfactory assurances from all who have given their improved machinery a trial, that there is no method of preparing floor-boards, matched linings, skirtings, &c., by which accuracy, despatch, and economy of material are so certainly obtained. In shooting, or groving and tonguing a board (although curved), the machine follows the edge, removing no more than the skin of the wood, and by the use of a peculiar saw for deep cutting, the board comes off with a perfect surface, thus obviating the necessity of reducing its thickness in order to plane out the hollows. The Company being neither builders nor timber merchants, unconnected with any trade but that of sawing and planing, and depending solely on the public for a moderate interest on their capital, are determined, by an assiduous attention to the interests of their customers, both as regards workmanship and general business arrangements, to merit a continuance of their support.
